A KITCHEN CABINET TV ABOVE A PAIR OF BUILT-IN OVENS

A Tucson homeowner wanted a TV in the cabinets above his built-in Wolf ovens, but worried the heat would be too much for it.

THE CHALLENGE

A TV above the built-in ovens.

A homeowner in Tucson, Arizona was redesigning his kitchen and wanted to put a TV in the cabinets above his built-in Wolf ovens. He was concerned that a standard television wouldn't be able to handle the heat from the ovens, so he gave us a call.

THE SUPPORT

The right television for his design.

He walked us through his plans. We confirmed that our Kitchen Cabinet TVs, which are certified heat resistant up to 175°F, would do the trick. We also worked with him to determine the exact model to fit his standard cabinetry size without requiring alterations to his plans.

THE SOLUTION

A heat-resistant TV that replaces a cabinet door.

His installer installed our 32″ Kitchen Cabinet TV into his planned cabinetry, cleanly and with no issues. Because our Kitchen Cabinet TVs replace a cabinet door, the homeowner still has full access to all the cabinet space behind the TV.

THE RESULT

A TV that belongs above the ovens.

- A kitchen television that complements the design of the high-end Wolf ovens.
- No performance issues, even when the ovens are in self-cleaning mode.
- Full access to the cabinet space behind the TV.

Be one with the ovens

"We love everything about it…."
